VERTISING PROGRESS

has proven itself mator of progress. ng long since hot- ing was as severly ridiculed as heat- ll qualifications. At There was as loud ions of advertis- ing claimed it was the quack and the ll everything to ing to sell. Then over the standard ment of progress, ustrious industry. advertising was a ly greatly. Now it is admitted to the ing and is kept on ll today. But big- beginning with the advertising. ion to advertis- ons soon followed by industry, commerce and the professions. The benefits of advertising had made themselves manifest in each step forward.

Then was the evolution of advertising, until today advertising plays a part in every phase of life and in the working industry. Such a field opened up for the lawyer, who still consider it unethical to advertise for business. He may plead his "cause" in the weekly newspaper or pulpit, the publisher, but it is considered unethical for the doctor or the lawyer to inform the public of his capabilities.

Nothing in life has attained perfection and evolution is an eternal, ever-continuing advancement. The evolution of advertising will not stop with its adoption by medicine and jurisprudence, but that adoption will establish another milestone of progress.
